## Fabritecture

Fabritecture is a specialist contractor providing tensile fabric structures around the world.

We are a project management company for the design, supply, fabrication and installation of bespoke fabric structures, tensile architecture, and special projects that combine steel and other forms of cladding where builders and architects struggle to find contractors to complete the works. We work with many membranes, including ETFE, PTFE and PVC.

Since our first office opened in the early 2000's, Fabritecture has built an impressive portfolio of high profile projects around the world. We are award-winning industry leaders. Fabritecture employs over 50 people across Australia, the Asia Pacific, Middle East and North American regions.

Our completed projects include the Adelaide Oval Redevelopment, Luna Park, Bankwest Stadium, Queensland Tennis Centre, Australian Embassy Jakarta, Pacific Fair Redevelopment, Westfield Chermiside Redevelopment, Scarborough Foreshore, Brisbane Airport, and North Queensland Stadium.

### Management

Group Managing Director (Australian Head Office)

#### **David Gullis**

Group Director (Australian Head Office)

### Regional Director

#### **Bjoern Beckert**

Managing Director (USA)

#### **Raheem Syeed**

Managing Director (Middle East)

## Allsite Structure Rentals

Allsite Structure Rentals is the leader in all-weather tensioned fabric structure buildings. We are not just a tent rental company. We are a provider of high quality engineered tension fabric structure buildings with a large clear span space that can be constructed in any environment.

With structure inventory depots located throughout the globe, Allsite can meet immediate needs for enclosures quickly and efficiently. Our experienced staff work closely with clients for the duration of the project to ensure expectations are not only met but exceeded.

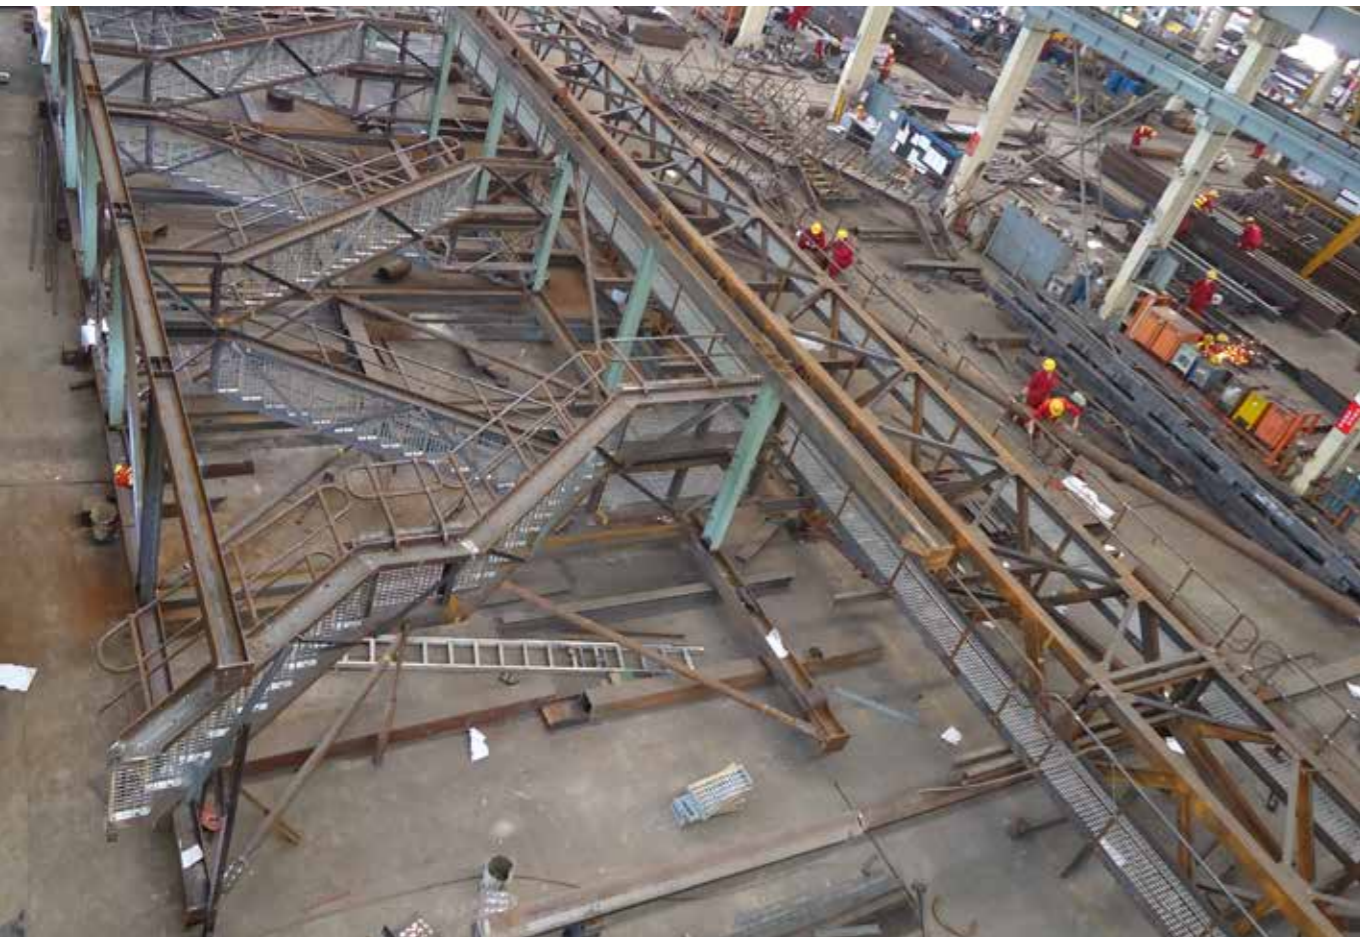

Allsite provides cost-effective, environmentally friendly temporary structure solutions for the most challenging or oversized job sites. With over a million square feet of portable shelters available throughout America, Europe, Asia and Australasia, Allsite Structure Rentals can have your building delivered and ready to use within days at nearly any location.

### Management

#### **Jason Cromwell**

General Manager (North America)

## Precise Procurement Services HK

Precise Procurement Services Hong Kong (PPS HK) specialises in connecting clients located in high-cost countries with high quality products manufactured at a lower cost. PPS HK has extensive experience in sourcing and supplying products that meet the highest possible international standards, including Australian, New Zealand, European, British and American Standards.

The Head Office of PPS HK is in Hong Kong and currently has 3 employees.

Over the last 7 years, we have developed an extensive network with only the best suppliers in China who have proven capability in meeting the quality requirements of our clients. We have longstanding arrangements and preferred pricing in place with a number of suppliers, which can add value to your business.

Our team understands the local market and culture and are excellent at maintaining strong and lasting relationships with suppliers. Our team will always strive to negotiate the best deal for all clients.

### Management

**Peter Cheung**  
General Manager (Guangzhou Head Office)

## Global Fabric Structures

Global Fabric Structures (GFS) specialises in the design, manufacture and installation of pre-engineered weatherproof fabric structures for interim or permanent applications.

Our range of pre-engineered fabric structures are designed to be quickly installed, easily relocated and fully recyclable.

Our group of companies offers in-country support, full turn-key solutions and a wide range of fabric structure solutions to meet your requirements across a diverse range of sports, recreation, military, mining, warehousing, industrial and remediation applications.

Our commitment is to provide a solution and a product that:

- Achieves the highest possible structural integrity, quality and safety standards
- Is economically viable and environmentally sustainable
- Is delivered and installed professionally on time, every time
